

Turf Teq power rake

Specs

The Turf Teq Power Rake is a valuable time-saving tool for all types of seedbed preparation, lawn renovation and raking jobs. With its compact design, the Power Rake can also go where tractor and skid steer mounted versions of this product can't go, and can do its job without damaging healthy turf.

The Power Rake features a 36 inch wide drum, and the pivot angle of the drum can be adjusted to the left or right from the operator position so that debris can be windrowed. The unit also features an on-the-go differential lock for exceptional traction and productivity.

The Power Rake performs the following functions:

- Rough Grading Soil
- Finishing around Newly Poured Walls
- Moving Soil from Piles
- Windrowing Rocks and Debris
- Renovating Lawns
- Reworking Dead Grass Areas
- Preparing Seed Beds
- Leveling High Spots in Lawns
- Repairing Damaged Sod Areas
- Dethatching Turf
- **Cutting for Over-Seeding**
